

Ethixion – Web Application Firewall by Ganesh Telore

Welcome to the official documentation of Ethixion, a lightweight, developer-friendly, secure-by-default Web Application Firewall (WAF) solution for protecting your web applications from a wide range of cyber threats.

Introduction

Ethixion provides an easy-to-integrate API-based firewall system for your web apps. It supports threat detection and prevention mechanisms like:

- ✓ Rate Limiting
- ✓ XSS (Cross-Site Scripting) Protection
- ✓ SQL Injection Prevention
- ✓ DoS Attack Detection
- ✓ Pattern-based Redirection Control
- ✓ Custom Rule Management
- ✓ Request Logging Dashboard

Features

-  API Key Based Secure Access
-  Easy-to-Use POST & Header-Based Integration
-  Redirect Mechanism Based on Request Validity
-  Dashboard for API Usage & Security Insights
-  Defense Against Common Web Threats
-  Custom Rule Definition (Coming Soon)
-  Free Plan with 30 Daily Requests (Paid Plans Coming Soon)

Quick Start

Step 1: Create an Account

Go to your Ethixion frontend and register to get your API Key and define your API name (apiname).

Current URL (Localhost): 127.0.0.1:2400

Step 2: Choose Integration Method

1. Form-Based Integration (POST)

Send a POST request to:

http://127.0.0.1:2400/ethix_gatekeeper

Required Parameters:

Parameter	Type	Description
apiname	String	Your unique API name registered on Ethixion
apikey	String	API Key associated with your account
redirect_url	String	URL to redirect to if request is valid
source_url	String	(Optional) Alternate URL to redirect if denied

2. Header-Based Integration (POST)

Send a POST request to:

http://127.0.0.1:2400/ethix_firewall

Required Headers:

Header	Description
x-api-name	Your registered API name
x-api-key	Your API key
x-redirect-url	(Optional) Alternate redirect if request fails

Dashboard Access

Log in to your Ethixion account to:

-  Monitor API usage
-  View allowed/blocked request logs
-  Manage firewall settings
-  Regenerate API Keys
-  Set custom redirection rules (coming soon)

Security & Threat Protection

Ethixion defends against:

-  Rate Limiting
-  XSS Protection
-  SQL Injection Protection
-  DoS Protection

⚙️ Rule Engine (Coming Soon)

Plans & Limits

Plan	Requests/day	Price
Free	30	₹0
Pro (coming soon)	5000+	₹TBD/month

Notes

- Ethixion must be integrated server-side or using secure client middleware.
- API Key leakage may compromise security.
- Always use HTTPS when hosted online.

Roadmap

- ✓ API Key Management
- ✓ Request Validation via POST/Header
- ✓ Dashboard Interface
- SOON Custom Rule Definitions
- SOON IP Blacklisting
- SOON API Usage Alerts
- SOON WebSocket Security Support
- SOON Global Deployment (Cloud Hosting)
- SOON Team-based Firewall Access

Why Use Ethixion

Because your web security shouldn't be complicated or expensive. Ethixion is built by developers, for developers — a fast, efficient, and reliable way to protect your web application with minimal integration. Whether you're building a personal blog or a SaaS platform, Ethixion gives you control, visibility, and safety, without the overhead.
